Claims 22-38, 56-79 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(b), claims 40-48, 53-55, directed to the process of making or using the allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104. Claim 50, directed to the invention(s) of Group IV do not require all the limitations of an allowable product claim, and has NOT been rejoined.

Because a claimed invention previously withdrawn from consideration under 37 CFR 1.142 has been rejoined, **the restriction requirement between groups I-III as set forth in the Office action mailed on May 1, 2006 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Theresa Chen on October 24, 2007.

The application has been amended as follows:

In the claims:

50. (canceled)

The following is an examiner's statement of reasons for allowance: claims 22-38, 40-48, 53-79 are drawn to a printed patch for transdermal administration of at least one therapeutically active agent comprising a non-adhesive liner and a dried pharmaceutical composition that comprises the active agent, a system comprising said printed patch, and a method of using the printed patch. The printed patch of the instant invention is novel and unobvious over the prior art because it comprises a uniform distribution of dried solid dots of the pharmaceutical composition present on the non-adhesive liner. A search of the prior art reveals that the printed patch of the instant invention is not known in the art, therefore, since the patch is novel and unobvious, the system incorporating the patch and the method of using the printed patch are also novel and unobvious.

Claims 22-38, 40-48, 53-79 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
